

Environmental Policy

Optimat is committed to sustainable development and caring for the environment is a key element of this commitment. The Company's environmental policy covers our minimised use of resources, recycling and pollution prevention or minimisation. In addition to addressing the impacts of our own operations we contribute to the sustainability of our clients through our consultancy support.

The key elements of our environmental management system are designed to ensure that our documented environmental management system meets the requirement of ISO 14001:2015.

The company policy has been defined by the Board of Directors as follows:-

- We will comply with all applicable regulatory environmental compliance requirements.
- Our commercial proposals will take account of Environmental issues and all relevant Codes of Practice.
- We will consider the implications of Climate Change upon the business.
- We will ensure all personnel receive adequate and appropriate training in environmental matters.
- We will take care to ensure that any substances, which are hazardous to both health and the environment, are handled safely and correctly.
- We are committed to continual environmental improvement and the protection of the environment including prevention of pollution.
- We will strive to continually improve the effectiveness of the Environmental Management System, which is an inherent part of our Integrated Management System.
- We will ensure this Policy is appropriate to the purpose and context of the business and provides a framework for setting the environmental objectives

This policy provides the framework for setting and reviewing of our Environmental KPI's and objectives and targets.

This Policy is communicated throughout the business, is reviewed on an annual basis at our Management Review Meetings and is available to the public via our website.
